InkTalk allows you to chat over the internet using handwriting. It features a powerful engine, browser-like interface and an innovative way of sending ink to and from other ink-enabled applications. In addition to sending ink to other InkTalk clients, you can also send ink to any third-party application that has a text-recognition engine. InkTalk is software that allows you to chat over the internet using handwriting. You can copy and paste ink to and from other ink-enabled applications like Windows Journal and also save your messages as a GIF file or as text file provided that operating system has a text-recognition engine (a real Tablet PC does, while the Tablet PC SDK does not). Related Articles Tips for Writing with InkTalk Where to download Feedback/Support: On the Link Page, you can enter the new Support User ID and

Password for your InkTalk account. InkTalk is currently free to download (including its source code) but you may be charged later for access to the text-to-speech conversion engine. (Full source code is available but the following is only the product description, no download link yet.) InkTalk is a PowerToy for the Tablet PC that allows you to chat with another InkTalk client over the internet using your natural handwriting. You can simply write your message and the other InkTalk client will see your message in your original handwriting. InkTalk is software that allows you to chat over the internet using handwriting. You can copy and paste ink to and from other ink-enabled applications like Windows Journal and also save your messages as a GIF file or as text file provided that operating system has a text-recognition engine (a real Tablet PC does, while the Tablet PC SDK does not). Requirements: ⮚.NET Framework 1.1 - Tablet PC SDK 1.5 InkTalk Description:

What's New in the InkTalk?

InkTalk was built with Tablet PC applications in mind. If you have an InkPad from Microsoft and an internet connection then you can download this application and enjoy a fully natural ink chat experience. .NET/Java versions of this application are available at You can use it over HTTP, MMS, GPRS, EDGE, UMTS, WiFi, Bluetooth, IEEE802.11B, 802.11g, and 802.11n using the free Mobile Broadband technology as long as the mobile device supports AT-commands and has a built in Internet connection. InkTalk is built to provide both the Web-site and the Mobile Broadcast-Notification-Service. To enable the Mobile Broadcast Notification-Service, configure your mobile device to push or pull notifications. This service will allow you to receive messages using AT-commands

from InkTalk software running on your Tablet PC or other ink-enabled devices. You can push notifications by selecting the "Push" option in the options menu on your mobile device. You can pull notifications by selecting the "Pull" option. To configure the Mobile Broadcast Notification-Service in your mobile device, visit InkTalk Chat is available for Windows Mobile 5.0, 5.5, 6.0 and Pocket PC 2003 and Windows Mobile 2003. InkTalk Chat is supported in the following countries: Australia Brazil Canada China Colombia Croatia Czech Republic Denmark Egypt Finland France Germany Great Britain Hungary India Iran Ireland Italy Japan Mexico Netherlands New Zealand Norway Peru Poland Portugal Romania Russia Slovakia Slovenia Spain Sweden Switzerland Turkey Ukraine United States You can also enable InkTalk Chat over EDGE by using the EDGE software that was bundled with your InkPad device. You can also use the built

in PC-side Internet software that comes with most Tablet PC operating systems to get connected to the Internet. If you are an Android user, we've built an Android tablet-only version of InkTalk Chat as well. You can download the Android version of InkTalk Chat at Our current release of the software is compatible with Android 1.6 and 1.5. Use the Global Chat key to access the global chat functionality. This is a downloadable application. You don't need any preinstalled software on your Tablet PC or other ink-enabled device. .NET/Java version of this application is available at

System Requirements:
