February 15, 2017 - Hello, I have an mpi network with address: 0 = modem, address: 2 = S7-300 plc, address: 3 = touchpad When I start step 7 program,

I will ... 8 posts Â· Got a new laptop with windows 7 64.. tried to download the software but it doesn't even see it... I got a new laptop with win 7 64 bit and I'm trying to download the software ..

but when I tried to open the software list folder software on a computer, on ... I just installed it on

another computer and tried to download the software from the site, but it does not see any program. I even tried to change the address on the

S7-300 but couldn't find any program. I can't figure out how to fix this. I am using windows 7 64bit To get started,
