What's new in Cold Iron - Quick Draw Western Duels:

Cold Iron Western Duels - "Quick Draw" What is a Western, you may ask? To me, a Western is a plot of land or land occupied by one or many tribes of Indians, travelers and settlers. These Indians and settlers are living and fighting a battle for survival in this remote place. Then there are often social and cultural clashes. From past times, the dramatic hero is the cowboy. He is shot at by a rifleman or a mountain man, and a shootout happens. This comes as a natural part of the Western culture. From classic authors of the 19th century such as James Fenimore Cooper and Hugh Bonsal, we have so many literary works described by this type of adventures. Gradually, the fictional Western heroes of the 20th century, such as the Marlon Brando, Clint Eastwood, and Roy Rogers, populates the pantheons of Hollywood. Although people can identify a spaghetti Western, usually in the 1970s, where the gun-fighting battle is common, they may not be that familiar with a swift gun duel in the American West. This often happens when you (a writer or director) shoot in the West. This becomes even more complicated when you don't know any of the writers. Because there are many deranged individuals out there that act upon their imaginations. That's why it's very important to know who the writer of a piece is, where he or she was brought up, and what they have been reading. I have worked with several Western directors and film actors. During the shooting of Cold Iron (my previous project), we did a promo for the Black Hills Kiwanis Film Festival. This festival is for homegrown short films (not TV episodes) that are filmed on location in the Black Hills. They are parts of the continent of Western America and/or Indian territory. The Black Hills Kiwanis Film Festival is a great festival that supports content creators who want to make their pieces for love and respect. Audience members are there to support them in their projects and devour those amazing stories in front of the camera.   As the production process of Cold Iron is going on, one of the writers (an intelligent gentleman) began to constantly come up with
